

Scientists of the University of Utrecht choose eLabJournal Electronic Lab Notebook

Groningen, 12 September 2015

Bio-ITech is excited to announce that scientists of the University of Utrecht has chosen eLabJournal Electronic Lab Notebook to replace the hand-written lab notebook.

After an extensive period of evaluation by scientists of the Science faculty of the University of Utrecht, the university decided to license the Bio-ITech Electronic Lab Notebook eLabJournal. At the end of 2013, the Bio-ITech started to deliver services to the university of Utrecht with the sample tracking system eLabInventory. With eLabInventory labs are able to fulfil the legal requirements for storing genetically modified organisms (GMO's) in the lab. Further extending the collaboration with the University of Utrecht is a new milestone for Bio-ITech. With eLabJournal, scientists can now also easily store experiment data and share their work with others. For many researchers already using eLabInventory, the upgrade to eLabJournal only a small step with many advantages. Now it is possible to directly link samples already organized in eLabInventory to experiments that can now be documented in eLabJournal. Labs or groups of the University of Utrecht interested in using eLabJournal, send your request to fbelabjournal@uu.nl.

About Bio-ITech

Bio-ITech is Life Science IT company that provides software solutions to manage information in the workflow of laboratories worldwide. Among the offered software solutions are an electronic lab notebook, a sample tracking system, and SOP management solutions.
